

RAHUL MEENA

Software Engineer Intern | Backend Developer | Full Stack Developer

Jaipur, India | +91 9521638916 | rahuljharwal2468@gmail.com | [LinkedIn](#) | [GitHub](#) | [LeetCode](#) | [Portfolio](#)

SUMMARY

Backend-focused Software Engineer Intern candidate and ECE undergraduate at IIIT Manipur. Built production-style systems with concurrency-safe workflows, real-time updates (SSE), JWT authentication, and cloud deployments. Strong foundation in DSA, OOP, OS, and Computer Networks.

TECHNICAL SKILLS

Languages: C++, JavaScript (ES6+), Python, C, HTML5, CSS3

Frontend: React.js, Next.js, Tailwind CSS, Responsive UI

Backend: Node.js, Express.js, REST APIs, JWT Authentication, API Development, Backend Architecture

Databases: MongoDB, PostgreSQL, Redis, Prisma ORM, Mongoose, Database Design

Tools & CS: Git, GitHub, Postman, Cloudinary, Vercel, Render, Data Structures and Algorithms, OOP, Operating Systems, Computer Networks

PROFESSIONAL EXPERIENCE

Web Development Intern

Remote

Plasmid Innovation Ltd. (MSME Registered)

May 2025 – July 2025

- Improved cross-device user experience by shipping 4+ responsive React.js pages with JavaScript, HTML, and CSS.
- Increased frontend maintainability by creating reusable UI components and reducing repeated layout code across pages.
- Strengthened release quality by testing and debugging 10+ UI workflows and API integrations using Postman and DevTools.
- Accelerated pre-release issue resolution by collaborating with developers to reproduce and fix 10+ UI/API defects.

TECHNICAL PROJECTS

Provider Mini Lead Distribution System | Tech: Next.js, Prisma ORM, PostgreSQL, SSE | [GitHub](#) | [Live Demo](#)

- Engineered a production-style lead distribution system with Next.js, PostgreSQL, Prisma ORM, REST APIs, and modular backend architecture.
- Optimized provider utilization through normalized database models and quota-aware round-robin allocation across 8 providers.
- Implemented concurrency-safe workflows with Prisma transactions, atomic operations, and constraints to create exactly 3 provider assignments per lead.
- Delivered real-time provider dashboard updates using Server-Sent Events (SSE), eliminating manual refreshes and polling overhead.
- Enforced webhook idempotency and duplicate lead prevention with PostgreSQL constraints and unique event validation.

YouTube & Tweet Platform | Tech: MERN, JWT, Cloudinary | [Backend](#) | [Frontend](#) | [Live Demo](#)

- Architected a scalable MERN backend using MVC design across models, controllers, routes, middleware, and utilities.
- Implemented JWT Authentication with access/refresh tokens, protected routes, user profiles, and secure session handling.
- Developed and validated 15+ REST APIs across 6 core modules: videos, tweets, likes, comments, subscriptions, and users.
- Integrated Cloudinary media storage with file-size validation, format checks, and secure upload handling for video workflows.

DSA Gemini Coach | Tech: JavaScript, Gemini AI, Data Structures and Algorithms | [GitHub](#)

- Built an AI-powered DSA coaching tool covering 5 core topic areas: Arrays, Strings, Trees, Dynamic Programming, and Graphs.
- Designed structured prompts for step-by-step hints, edge-case analysis, and time/space complexity explanations.
- Focused responses on reasoning and algorithmic thinking instead of directly revealing final answers.

EDUCATION

Indian Institute of Information Technology (IIIT), Manipur

Expected Aug 2027

B.Tech in Electronics & Communication Engineering | CGPA: 7.00/10

Relevant Coursework: Data Structures and Algorithms, Object-Oriented Programming, Operating Systems, Computer Networks

CERTIFICATIONS & ACCOMPLISHMENTS

- Solved 120+ LeetCode problems across Arrays, Strings, Trees, Dynamic Programming, and Graphs.
- Selected for Startup DPIIT Mahakumbh 2025; represented IIIT Manipur and the ST community in a national startup ecosystem event.
- Received a Letter of Recommendation from Senior Manager HR for training performance.

LANGUAGES

English (Fluent) | Hindi (Advanced)
